WIND-FREE™ COOLING

- Wind-Free™ Cooling is designed to cool gently and quietly to minimise the unpleasant feeling of cold wind on your skin, as it disperses air through 23,000 micro air holes. It creates a 'Still Air' environment* with very low air speed and minimal noise.
- Its advanced airflow structure also means it cools a wider and larger area more evenly.
- Wind-Free™ Cooling consumes approximately 77% less energy than in Fast Cooling mode.

WI-FI

- Remotely control and monitor the GEO WIND-FREE A/C from anywhere and anytime, using the SmartThings app.
