

## Benefits of ECODUCT:

- COMPLIANCE
  - Ecoduct is the only Australian made low profile PVC ductwork that fully complies with all relevant Australian Standards and BCA requirements.
  
- AUSTRALIAN MADE
  - Ecoduct is made in Victoria and due to this we have full control over our formulation/production which ensures full compliance.
  - Mid-Long term material order forecasting is no longer required by clients. Ecoduct can be dispatched and received anywhere in Australia within a week.
  - By using Ecoduct the client will be supporting Australian jobs and Manufacturing.
  
- SIZE (300x70)
  - Ecoduct will fit into most ceiling spaces and will efficiently exhaust up to 180l/s.
  - It has no support chambers running along the length of the duct ensuring airflow is maximised and system static minimised.
  - Ecoduct fittings have also been specifically designed to reduce static.
  
- BEST PRACTICE PVC (Green Credentials)
  - Ecoduct is a certified Best Practice PVC product making it Green Star compliant.
  - Our formulation is made up of up to 50% recycled PVC and is 100% recyclable.
  - Ecoduct is also a member of the Green Building Council of Australia.
  - Ecoduct uses lead free stabilisers (commonly used in imported PVC products)
