

Proudly Australian Made

Where you'll find us

The term 'Australian made' has been loosely used by foreign owned companies.

Air Diffusion is 100% Australian owned so you can do business with us knowing you are supporting a local brand.

When you deal directly with Air Diffusion Agencies you can rely on product being available. Whether it is a stock line or a specially run line, we've got what you need to suit your particular project.

Don't risk miscommunication issues, or being at the mercy of transport companies, talk to your local Air Diffusion Agencies.

Visit one of our conveniently located branches or give us a call.

Premium Polyester Insulation

*Your one stop
airconditioning shop!*

www.airdiffusion.com.au

A Local Family Business

100% Australian family owned and managed, Air Diffusion Agencies employ over 200 staff in 7 locations around Australia.

The polyester insulation plant has been in operation since 2003 (trading as Auspoly International and Fibreco Holdings).

Whilst names have changed the quality and service has only strengthened and we continue to be the number one supplier of premium insulation.

As well as premium polyester insulation, we offer a complete range of air conditioning products including flexible ducting, fittings, ductboard and sheetmetal components, grilles, zoning equipment, spare parts and units.

We really are your one stop trade centre!

Great for the environment

Consumers, both commercial and domestic, have very sound reasons to specify polyester insulation.

Much of the raw materials used in its manufacture is recycled polyethylene terephthalate (P.E.T) clear plastic beverage containers.

Our polyester is 100% recyclable and has a zero ozone depleting potential (ODP). It does not contain any volatile organic compounds (VOC), or corrosive chemicals.

Our Polyester is Global GreenTag certified which means it's passed the world's toughest standards to protect you, and your family's health and safety.

Importantly choosing our polyester, over other insulation options, will minimise your impact on our finite planet.

The polyester that is commonly used in bedding, clothing and even the pillow you sleep on, is made of the same fibre that makes Air Diffusion Insulation.

Common Fiberglass insulations on the market can cause eye, skin and nose irritation, breathing difficulties, a sore throat, hoarseness and coughing.

Polyester however, sheds no dangerous fibres and is approved to be used in asthma friendly buildings by Asthma Australia.

Meeting Architectural Needs

We are able to customise product thickness, density and size and happy to work with you to develop the right product for your project.
