

## OUTSIDE AIR LOUVRE Model ADOAL25

### DESIGN DETAILS (mm)

### APPLICATIONS

A popular outside air louvre suitable for supply, relief and exhaust applications.

The sloping blade design minimises water ingress and provides good protection against general weather conditions

Bird mesh is fitted to the rear of the blades to prevent unwanted objects passing through the louvre.

Designed with clean lines to visually compliment the exterior of buildings.

### STOCK SIZES

Code	Neck Size
OAL251515	150 X 150
